On ne le répétera jamais assez les premières minutes sont capitales dans une situation d'urgence et savoir prendre les bonnes décisions un enjeu de santé primordial. L'infirmier doit pouvoir prodiguer les premiers soins d'urgence dans l'attente de l'arrivée du médecin. La pratique de l'urgence ne se cantonne d'ailleurs plus aux uniques urgences intra et pré hospitalières. L'évolution incessante de la pratique de soins contraint les infirmiers et aides soignants à intervenir dans des cas de pathologies aiguës de plus en plus souvent hors du champ du centre hospitalier et à décider du besoin d'une intervention médicale aussi. Ces 100 fiches pratiques infirmières face aux situations d'urgence permettent à l'infirmier d'identifier les symptômes et répondent parfaitement à la nécessité d'avoir une connaissance rapide des différentes pathologies rencontrées dans le cadre de la législation et d'une conduite de bonnes pratiques claire simple et pragmatique. Chacune de ces fiches suit le même déroulé : définition, diagnostic infirmier, prise en charge infirmière et pour chaque fiche le rôle de l'aide soignant est mis en évidence. La bonne prise en charge d'un patient requérant une excellente coordination entre l'activité de l'infirmier et celle de l'aide soignant est regroupée en 18 parties, notamment par spécialité. Ces fiches sont toutes accompagnées d'un arbre décisionnel récapitulatif de la prise en charge infirmière. Les deux dernières parties sont consacrées spécifiquement aux problèmes médico légaux, à la législation professionnelle et à un rappel des actes de soins infirmiers indispensables dans la pratique professionnelle. Ce livre, outil en couleurs et spiralé, est destiné aussi bien aux étudiants infirmiers qu'aux infirmiers diplômés d'État soucieux de prendre les bonnes décisions.
